Question No. 1

You are about to begin a Policy Automation project.

Which two aspects of this project are reasons to use Collaboration?

- **A.** The project will require sharing rules across multiple policy models.
- **B.** Communications with the client and policy experts will be frequent.
- **C.** The project will involve highly complex source policy that is sometimes subject to interpretation.
- **D.** More than one policy modeler will be working simultaneously on the project.
- **E.** The policy model will handle large amounts of data after it is deployed into production.

Answer: A, E

Question No. 2

You have a requirement to identify whether an applicant is eligible for a child support payment. To be eligible, the applicant must have at least two children of school age. You will collect the details of each of the person's children to infer whether each child is of school age, and from that infer whether or not the person is eligible.

Which data model approach supports this requirement?

- **A.** Create attributes for the child's name and the child's age in the Global entity.
- **B.** Create an entity called the child with a containment relationship from the Global entity. Create attributes for the child's name and the child's age in the child entity.
- **C.** Create an entity called the child under the Global entity with an attribute for the number of children of school age.
- **D.** Create an entity called the child under the Global entity with attributes for the child's name and the child's age with a reference relationship to the global entity.
- **E.** Create an entity container on an interview screen and add name and age attributes for at least two children.

Answer: C

Question No. 3

You are working in a project where you need to develop a rule to calculate the currency attribute ''the person's total taxable income''. The person's total taxable income is either the sum of the attributes ''the person's wages'' and ''the person's interest'' or $50,000, whichever is lower.

What rule should you develop?

A. the person's total taxable income = MinVal((the person's wages + the person's interest), 50000)

B. the person's total taxable income
    Minimum((the person's wages + the person's interest), 50000)

C. the person's total taxable income
    MinVal((the person's wages + the person's interest), 50000)

D. the person's total taxable income = Minimum((the person's wages + the person's interest), 50000)

E. the person's total taxable income = Minimum(the person's wages + the person's interest), 50000)

- **A.** Option A
- **B.** Option B
- **C.** Option C
- **D.** Option D
- **E.** Option E
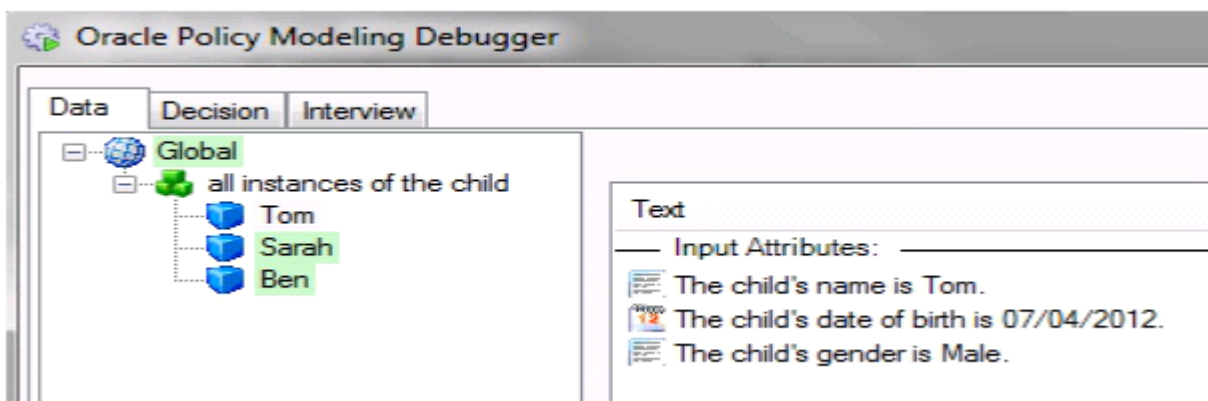

Answer: B

Question No. 4

Which two options require custom development with the OPA Mobile SDK?

- **A.** running OPA Mobile on Android devices
- **B.** incorporating OPA Mobile interviews into composite mobile applications
- **C.** adding an upload control to a OPA Mobile interview screen
- **D.** running OPA Mobile interviews while offline
- **E.** synchronizing data collected in OPA Mobile with a custom back-end system

Answer: B, E

Question No. 5

Exhibit:

Assuming each child has a unique date of birth, which set of Policy Modeling functions should you

use to determine the same of the youngest female child?

- **A.** Exists, InstanceMinimumIf
- **B.** InstanceMinimumIf, InstanceValueIf
- **C.** InstanceValueIf, InstanceMinimum
- **D.** Minimum, InstanceValue
