### Question No. 1

Which two statements are true about JDEBase Database Middleware?

- **A.** It provides a set of translation programs to JD Edwards EnterpriseOne that are embedded in data source definitions.
- **B.** It contains processing requests such as business functions, batch jobs, and EnterpriseOne login security.
- **C.** It provides platform-independent Application Program Interfaces (APIs) to access multiple database versions.
- **D.** It is the JD Edwards EnterpriseOne proprietary communication middleware package that provides server-to-server and client-to-server communication.

**Answer:** C, D

### Question No. 2

Which three statements are true about managing and configuring JDE kernels?

- **A.** Enabling debug logging on a kernel requires restart of the JDE services on an enterprise server.
- **B.** The security kernel supports multi-thread processing, and handles multiple data/cache requests at a time.
- **C.** The configuration setting maxNetProcesses defines the maximum number of jdenet\_n processes that are allowed to run simultaneously.
- **D.** The TCP port number defined in the ServiceNameConnect configuration parameter is used to listen to all incoming JDENET messages.
- **E.** The JDENET process has the capability to launch a child process called Kernels (jdenet\_k) as and when request messages come in from clients or servers.
- **F.** The Reset Cache operation from the Work With Servers (P986116) application affects only the Call Object kernels. No other kernel is impacted.

**Answer:** C, E, F

### Question No. 3

Before Tools 9.2.1.0, which three object types had components stored on the deployment server's patch code check-in location?

- **A.** Tables
- **B.** BSSV Business Functions
- **C.** Data Dictionary
- **D.** C Business Functions
- **E.** Tasks

**Answer:** A, B, D

### Question No. 4

Which two statements are true about JD Edwards EnterpriseOne subsystem jobs functionality?

- **A.** Running a report multiple times as a subsystem job overwrites the PDF output file after each execution and creates only one PDF output at the end of the subsystem job execution.
- **B.** There is no difference between executing a subsystem job on the client and enterprise

servers.

- **C.** You cannot control the limit for simultaneous execution of subsystem jobs per report.
- **D.** Short duration jobs are an ideal fit for running as subsystem jobs and they run into an Infinite loop throughout the UBE logic avoiding multiple submissions of the same job.
- **E.** There is no difference between Ending or Stopping a subsystem job as both terminates the subsystem jobs instantly.

**Answer:** A, B

### **Question No. 5**

Which Package Assembly form must you use to define the system code files to be included in a package?

- **A.** Object Component form
- **B.** Foundation Component form
- **C.** Database Component form
- **D.** Features Component form
- **E.** Language Component form

**Answer:** D
