Question No. 1

You are associating network-interface configuration elements with a physical-interface configuration element on the Session Border Controller.

Which parameter must contain the same unique ID in these two configuration elements?

- A. port-id
- B. identifier
- C. unique-id
- D. name
- E. sub-port-id

Answer: A

Question No. 2

You made a configuration change to a media interface.

Which command must be executed to commit the change to volatile (RAM) memory?

- A. From configuration mode, execute the done command.
- B. From superuser mode, execute the write-config command.
- C. From user mode, execute the save-config command.
- D. From user mode, execute the commit-config command.
- E. From superuser mode, execute the save-config command.

Answer: A

Question No. 3

You are troubleshooting a SIP routing issue and you have access to the SIP call log processed by the Session Border Controller.

Which two steps are valid for troubleshooting this type of issues? (Choose two.)

- A. It is necessary to locate the SIP session to troubleshoot and check if there is a 404 Routes Not Found SIP error message.
- B. It is recommended to look for 183 Session Progress SIP error messages that indicate routing issues.
- C. It is recommended to check the called number by looking at the Request-URI of the INVITE message and making sure it is a valid number to be routed.
- D. It is recommended to find the CANCEL method received by the Session Border Controller which typically identifies a SIP routing issue.
- E. It is necessary to find an initial INVITE received by the Session Border Controller which gets a 503 Service Unavailable SIP error message.

Answer: B, E

Question No. 4

How does the Session Border Controller ensure that a pinhole is kept open for persistent communication to a SIP endpoint behind a NAT device?

- **A.** by changing the expires= parameter to a defined value in 200 OK responses to REGISTERs
- **B.** by changing the expires= parameter to a defined value in 200 OK responses to INVITEs
- **C.** by issuing PINGs to the endpoint's NAT address
- **D.** by sending Address Resolution Protocol (ARP) requests at a defined frequency
- **E.** by sending messages at a defined frequency

Answer: D

Question No. 5

Which node automatically assumes the active role when peers boot simultaneously and their health scores are equivalent in a High Availability (HA) scenario?

- **A.** the node with the highest wancom IP address
- **B.** the node that is configured as secondary
- **C.** the node that had the role of active last
- **D.** the node with the lowest wancom IP address
- **E.** the node with the highest round-robin score

Answer: D
