### Question No. 1

You have been asked to select the appropriate security policy to apply to a SOAP web service data control. The web service is accessed over HTTPS. In addition, the web service calls must use the same single sign-on infrastructure as the other web applications deployed on the network. That way, users will not have to authenticate again if they navigate between remote URL features and AMX features making web service calls.

Which policy would you choose?

- **A.** oracle/wss\_http\_token\_over\_ssl\_client\_policy
- **B.** oracle/wss\_username\_token\_client\_policy
- **C.** oracle/soap\_over\_ssl\_client\_policy
- **D.** oracle/wss11\_message\_protection\_client\_policy

**Answer:** A

### Question No. 2

You are developing the UI pages of your Oracle MAF application and you want the pages to be cross platform-compatible and future-proof from changes to support the updated platforms.

Which is the best content type choice for developing your UI pages in MAF?

- **A.** Local HTML
- **B.** Local AMX
- **C.** Remote URL
- **D.** Page Fragment

**Answer:** B

### Question No. 3

You have built a mobile application with features X and Y. You have implemented an application level oracle.adfmf.application.LifecycleListener named AppListener with methods start(), stop(), activate(), and deactivate(). You have also implemented two feature-level oracle.adfmf.feature.LifecycleListenerclasses for features X and Y named XListener and YListener with methods activate() and deactivate().

A user has opened your application and the code is currently executing in feature X. The user then performs the following steps:

1. Suspend the application (put it in the background).
2. Start the application.
3. Open feature Y.

Which option describes the methods and the specific order in which they are invoked when the user performs these steps?

- **A.** AppListener.stop(), AppListener.start(), YListener.activate()
- **B.** XListener.deactivate(), AppListener.deactivate(), AppListener.activate(), XListener.activate(), XListener.deactivate(), YListener.activate()

- C. XListener.stop(), YListener.activate()
- D. XListener.deactivate(), XListener.activate(), XListener.deactivate(), YListener.activate()

**Answer: A**

#### **Question No. 4**

Which behavior results from this code inside an amx:listItem component?

- A. When someone taps an item in the list, the item is automatically approved.
- B. When someone taps and holds a list item, a fixed value is set in a variable that will be available in another page in the same task flow.
- C. An exception occurs because this is not a valid use of pageFlowScope variables.
- D. When someone taps and holds a list item, the value of the "approved" variable is evaluated and, if it is "yes", you perform a specific action.

**Answer: D**

#### **Question No. 5**

Your application has the requirement to create a shopping cart feature with multiple pages to search and select items and separate pages to pay and finalize the transaction.

When defining this feature in MAF, which single content type is the correct choice?

- A. fragment
- B. local AMX
- C. local HTML
- D. declarative component
- E. remote URL
- F. bounded task flow
- G. unbounded task flow
- H. remote task flow

**Answer: D, E, F**
