

Pass Oracle 1Z0-997 Exam Quickly With CertificationsBuzz

Oracle certification plays an important role to open many doors of opportunities in your career. More than 90% of HR managers use **Oracle Cloud 1Z0-997 Dumps** certification as screening or hiring criteria during the recruitment process. They give preference to hiring a certified Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Exam Questions candidate rather than a fresh graduate. So either you are a beginner or an experienced professional you must enrol in the 1Z0-997 Certification Exam Dumps and try your best to pass the 1Z0-997 Certification Exam Questions. In this way, you can easily accelerate your career and stand out from the crowd in the highly competitive market. However, it is not as simple as it is described. To pass the **Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997** Certification Exam Dumps you have to prepare well with the help of valid, updated, real **1Z0-997 Dumps**. Do you have a plan to pass the Oracle Cloud 1Z0-997 Exam Questions? Are you ready to take action? Today is the best time to take control of your career and choose the best 1Z0-997 Exam Dumps preparation platform like CertificationsBuzz. At this platform, you will find everything that you need to learn, prepare and pass the challenging 1Z0-997 Exam Questions in the first attempt.

Top Features Of CertificationsBuzz Oracle 1Z0-997 Exam Dumps

CertificationsBuzz is committed to offering the best way that not only aces your **Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997** Exam Dumps preparation but also enables you to pass the final Oracle Cloud **1Z0-997 Questions** even on the first attempt. CertificationsBuzz has been offering its services for many years. The thousands of candidates have passed their dream 1Z0-997 Certification Exam Dumps quickly. They all used the 1Z0-997 Exam Practice Questions and got success in **Oracle Cloud 1Z0-997** Exam Dumps with flying colours. You may be the next successful candidate for the Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Certification Exam Questions. As far as 1Z0-997 Exam Dumps are concerned, these real questions are designed by experienced and certified professionals. They strive their best to maintain the best quality of 1Z0-997 Exam Practice Questions all the time. So you rest assured that with **Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997** Exam Dumps you will pass the final

Oracle Cloud 1Z0-997 Exam Questions easily. 1Z0-997 Exam Dumps are categorized into three easy to use and compatible formats. These formats are ***Oracle Cloud 1Z0-997*** Dumps PDF file, 1Z0-997 Desktop Practice Test Software and 1Z0-997 Web-Based Practice Exam. All these formats come with some unique and common features. Let's talk one by one about the top features of Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Exam Questions formats.

CertificationsBuzz Oracle 1Z0-997 Desktop Practice Test Software:

Oracle Cloud 1Z0-997 Desktop Practice Test Software is a mock Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Exam Practice Questions that are designed to provide real-time ***Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997*** Exam Dumps experience. 1Z0-997 Desktop Practice Test Software is user friendly and compatible software. You do not need any special software or driver to install 1Z0-997 Desktop Practice Test Software. Just download and start your ***Oracle Cloud 1Z0-997*** Exam Practice Questions preparation.

CertificationsBuzz Oracle 1Z0-997 Web-based Practice Test Software:

Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Web-Based Practice Test Software is a browser-based application that is compatible with all latest browsers such as Safari, Opera, Chrome and Firefox etc. To run this application you just need to download ***Oracle Cloud 1Z0-997*** Web-Based Practice Exam Software and then put a link into any popular browser and start your 1Z0-997 Practice Test preparation. Now with ***Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997*** Web-Based Practice Test Software, you can start your 1Z0-997 Practice Exam preparation anytime and anywhere. and pass your dream **[Oracle Certification Exam](#)** easily.

CertificationsBuzz Oracle 1Z0-997 Dumps In PDF Format:

Oracle Cloud 1Z0-997 PDF Practice Questions are the most wanted product of CertificationsBuzz. In this PDF file all valid, updated and real ***Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997*** Exam Dumps are included. The CertificationsBuzz 1Z0-997 PDF Dumps are the real questions that will be repeated in the final 1Z0-997 Exam Questions. You just need to download it after payment and start your Oracle Cloud 1Z0-997 Exam Dumps preparation. To run the Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 PDF Questions file you do not need any special software or driver. Just get the 1Z0-997 PDF Dumps and start your 1Z0-997 Exam Questions preparation journey instantly. Today is the right time to take action and control your career. To do this just enrol in the Oracle Cloud Infrastructure 2019 Architect Professional 1Z0-997 Exam Dumps and download ***Oracle Cloud 1Z0-997*** Exam Practice Questions and start your preparation. Best of luck.

Question No. 1

You are running a legacy application in a compute instance on Oracle Cloud Infrastructure (OCI). To provide enough space for it to store internal data, a block volume is attached to the instance in paravirtualized mode. Your application is not resilient to crash-consistent backup.

What should you do to securely backup the block volume?

- **A.** Create a volume group, add the block volume and boot volume and then run the volume group backup.
- **B.** Before creating a backup, save your application data and detach the block volume.
- **C.** Create a backup, detach the block volume and save your application data.
- **D.** Use the block volume clone feature to save cost and speed up the backup process.

Answer: D

Question No. 2

Your organization is planning on using Oracle Cloud Infrastructure (OCI) File Storage Service (FSS). You will be deploying multiple compute instances in Oracle Cloud Infrastructure (OCI) and mounting the file system to these compute instances. The file system will hold payment data processed by a Database instance and utilized by compute instances to create an overall inventory report. You need to restrict access to this data for specific compute instances and must be allowed/blocked per compute instance's CIDR block.

Which option can you use to secure access?

- **A.** Use stateless Security List rule to restrict access from known IP addresses only.
- **B.** Create a new VCN security list, choose SOURCE TYPE as Service and SOURCE SERVICE as FSS. Add stateless ingress and egress rules for specific IP address and CIDR blocks.
- **C.** Use 'Export option' feature of FSS to restrict access to the mounted file systems.
- **D.** Create and configure OCI Web Application Firewall service with built-in DNS-based intelligent routing.

Answer: C

Question No. 3

You have deployed a multi-tier application with multiple compute instances in Oracle Cloud Infrastructure. You want to back up these volumes and have decided to use Volume Group's feature. The Block volume and Compute instances exist in different compartments within your tenancy.

Periodically, a few child compartments are moved under different parent compartments, and you notice that sometimes volume group backup fails.

What could be the cause?

- **A.** You are exceeding your volume group backup quota configured.
- **B.** You have the same block volume attached to multiple compute instances; if these compute instances are in different compartments then all concerned compartments must be moved at the same time.
- **C.** Compute instance with multiple block volumes attached cannot move when a compartment is moved.

- **D.** The Identity and Access Management policy allowing backup failed to move when the compartment was moved.

Answer: D

Question No. 4

An insurance company is storing critical financial data in the OCI block volume. This volume is currently encrypted using oracle managed keys. Due to regulatory compliance, the customer wants to encrypt the data using the keys that they can control and not the keys which are controlled by Oracle.

What of the following series of tasks are required to encrypt the block volume using customer managed keys?

- **A.** Create a vault, import your master encryption key into the vault, generate data encryption key, assign data encryption key to the block volume
- **B.** Create a master encryption key, create a data encryption key, decrypt the block volume using existing oracle managed keys, encrypt the block volume using the data encryption key
- **C.** Create a vault, create a master encryption key in the vault, assign this master encryption key to the block volume
- **D.** Create a master encryption key, create a new version of the encryption key, decrypt the block volume using existing oracle managed keys and encrypt using new version of the encryption key

Answer: C

Question No. 5

You are part of a project team working in the development environment created in OCI. You have realized that the CIDR block specified for one of the subnet in a VCN is not correct and want to delete the subnet. While deleting you are getting an error indicating that there are still resources that you must delete first. The error includes the OCID of the VNIC that is in the subnet.

Which of the following action you will take to troubleshoot this issue?

- **A.** Use OCI CLI to call "GetVnic" operation to find out the parent resource of the VNIC
- **B.** Copy and Paste OCID of the VNIC in the search box of the OCI Console to find out the parent resource of the VNIC
- **C.** Use OCI CLI to delete the VNIC first and then delete the subnet
- **D.** Use OCI CLI to delete the subnet using --force option

Answer: A
