Question No. 1

Which option enables a user to enter a value of their choice when creating a filter for use within the OFSC management views?

- **A.** Ensure that the assigned User Type has read/write access to the Filters configuration screen.
- **B.** Ensure that the filter is listed in the Restrictions and Filters section of the assigned User Type.
- **C.** Select the "Dynamic" option when specifying the filter conditions.
- **D.** Deselect the "Dynamic" option when specifying the filter conditions.

Answer: B

Question No. 2

Your customer has received some complaints about certain resources, and that information has been recorded within their CRM system.

They want to pass this information along when activities are booked and sent to OFSC, so that it can be used as a routing constraint for any of their customer-facing Activity Types.

Which standard Activity Type features must be enabled to support this requirement?

- **A.** "Allow creation in buckets" and "Allow move between resources"
- **B.** "Allow to create from incoming interface" and "Support of preferred resources"
- **C.** "Allow to create from incoming interface" and "Allow move between resources"
- **D.** "Allow Mass Activities" and "Support of preferred resources"

Answer: A

Question No. 3

Your customer wants help configuring a message scenario that, when launched, populates a proper* (A_TIME) with the time the message was created (message_time_of_creation).

What must be entered in the subject and body of the message pattern to support this requirement?

- **A.** The message subject should be: {A_TIME}. The message body should be: message_time_of_creation.
- **B.** The message subject should be: message_time_of_creation. The message body should be: A^TIME.
- **C.** The message subject should be: {message_time_of_creation}. The message body should be: {A_TIME}.
- **D.** The message subject should be: {A_TIME}. The message body should be: {message_time_of_creation}.
- **E.** The message subject should be: A.TIME. The message body should be: {message_time_of_creation}.

Answer: A

Question No. 4

Your customer wants to configure an inner step message ("B") to send an email if a previous messa

("A") has Failed.

Which statement explains how this can be supported?

- **A.** In the Message Scenario screen's Blocking Conditions tab of message B, add a condition that blocks the message when the message A's status is NOT IN failed.
- **B.** In the Message Scenario screen's Next Steps tab of message A, add message B as the Next Message Step with the final status "Failed".
- **C.** In the Message Scenario screen's Next Steps tab of message B, add message A as the Next Message Step with the final status "Failed".
- **D.** In the Message Scenario screen's Blocking Conditions tab of message B, add a condition that blocks the message when the message A's status is NOT IN sent.

Answer: A

Question No. 5

Your customer wants their technicians to see the same activity data in their Service within their Activity List in OFSC Mobility.

Which configuration supports this requirement?

- **A.** Add the "Activity" property to the Request Grid context in Mobility.
- **B.** Add the appropriate activity properties to the Request Grid context in Mobility.
- **C.** Add the "Activity" property to the "Identify service request by" identifier context.
- **D.** Add the appropriate activity properties to the "Identify service request by" identifier context.

Answer: A
