Question No. 1

Which feature flag lifecycle stage includes OIC features that you can request from Oracle to be disabled within your OIC instance environment?

- **A.** Internal Only
- **B.** General Availability
- **C.** Feature Controlled
- **D.** Feature Controlled General Availability

Answer: C

Question No. 2

You have been tasked with provisioning a Managed File Transfer (MFT) Cloud Service on Oracle Cloud Infrastructure (OCI).

Which of provisioning requirement is NOT valid?

- **A.** You are required to obtain an authentication token for an Object Storage bucket within an accessible OCI compartment.
- **B.** You can use any Oracle Database instance running in either OCI or OCI Classic.
- **C.** You must create a Virtual Cloud Network in OCI with at least two subnets.
- **D.** Provisioning MFT requires creating a SOA Cloud Service instance in OCI choosing "MFT Cluster" as a service type.

Answer: C

Question No. 3

As a Process Cloud developer, you have been tasked with integrating Oracle Content and Experience Cloud with a process application. Since this is a document-centric process that will involve collaboration with process participants, it has been determined that the document and conversation functionality should be used.

Which task is NOT required?

- **A.** You will need to create a new process application since conversation functionality cannot be enabled for pre-existing applications.
- **B.** You must manually enable the document and conversation features for your process application.
- **C.** You will need to have the administrator configure the connection between Oracle Process Cloud and Oracle Content and Experience Cloud since developers do not have those permissions.
- **D.** You will need to assign conversation viewers to either an Oracle Content and Experience user role or Oracle Documents Cloud Service user role.

Answer: A

Question No. 4

During a design review of your OIC orchestration-style integration, it has been recommended that you refactor it into smaller integrations.

Which two things should you do in order to invoke the multiple integrations without needing to create explicit connections for each endpoint?

- **A.** Import each local integration you wish to invoke into your calling integration environment.
- **B.** Add the local-enabled flag for each integration you wish to invoke.
- **C.** Use the local integration wizard to define each integration to be invoked.
- **D.** Request the enablement of the `oic.ics.console.integration.local.integration` feature flag.
- **E.** Build each smaller integration as a local-only integration interface.

Answer: C, E

Question No. 5

You are developing orchestration-style integrations in the OIC Designer Portal and have discovered that the Outline View is not available in your OIC instance environment.

What is the name of the feature flag you will need to request to be enabled by raising a Service Request from My Oracle Support?

- **A.** `oic.console.integration.outlineview`
- **B.** `oic.ics.console.integration.layout`
- **C.** `oic.console.integration.outline`
- **D.** `oic.console.integration.pseudoviewl`

Answer: B
